Global fund flows, week ending July 23

Goldman Sachs & Co. LLC

- Flows into mutual funds and related investment products showed modest flows into equities and strong flows into bonds.
- Net flows into global **equity** funds were soft in the week ending July 23 (+\$6bn vs +\$5bn in the previous week). Across G10, flows were mixed; US and Japan equity funds saw net outflows, while Euro area equity funds saw net inflows. Investors remain focused on repatriation out of US assets; the data continue to suggest that foreign demand for US equities has slowed significantly and remains subdued across both Europe and Asia (see below). This is primarily true in equities, while bond flows have not exhibited a similar pattern. Global and EM benchmark funds both saw solid demand. Within EM, South Korea has continued to see the strongest inflows in recent weeks, while Taiwan has seen the largest outflows. At the sector level, industrials and financials continue to attract the strongest net inflows. There has been a more notable divergence between flows into cyclicals versus defensives since the beginning of July, with investors showing a stronger preference for cyclicals and net selling defensives (see *Chart of the Week*).
- Flows into global **fixed income** funds were very firm, with demand benefiting both government and corporate credit products (+\$27bn vs +\$17bn in the previous week). Over the last four weeks, bank loans have seen the strongest inflows as a percentage of AUM. Investors have also begun to net purchase inflation-protected securities over the past two weeks. In EM, local currency bond funds continue to attract very strong inflows. **Money market** fund assets increased by \$14bn.
- Cross-border **FX flows** were strong. EUR continues to attract firm net foreign inflows. In Asia, SGD, TWD, and HKD have seen the strongest foreign inflows in recent weeks.
